## Net sales

## Operating income

## Information infrastructure

\* A part of sales used to be recognized as Non-Stock sales (e.g. 1st-year maintenance included in the products and subscriptions) were recognized as Stock sales as a result of applying the New Accounting Standard for sales Recognition. Therefore, Stock ratio went up.

## Application service

\* Stock ratio went up because a part of sales used to be recognized as Non-Stock sales (e.g. subscriptions for testing tools) were recognized as Stock sales as a result of applying the Accounting Standard for sales Recognition and cloud business continues to grow.

We continue business strategy of TMX 3.0

- Strategic and accelerated promotion of cloud-related business
- Pursuit of security and safety

# BEYOND THE NEW NORMAL 3-year targets revised reason

As a result of the merger of NOBORI with PSP, which became a consolidated subsidiary in the previous fiscal year, new PSP was established as a consolidated subsidiary of the Company on April 1, 2022. In response, we reviewed the performance plans for the second and third years of the medium-term management plan.

The integrated company plans to promote a cloud shift of medical image management systems (PACS) used by former PSP's existing customers with the aim of shifting to a stock-type business. Although the shift to the cloud will cause a short-term decline in sales and operating income, the company plans to make the move as a management decision with an eye to the future. In the 39th fiscal year, the company incorporated additional extraordinary expenses of approximately 200 million yen in relation to headquarters relocation, including transportation costs, disposal costs, and double rent for the purpose of constructing a new office.
